

DATA^{PAEB}Works!

Help Desk

Advancing data sharing and reuse

DATAWorks!^{FASEB} Help Desk

Are you seeking assistance to navigate data management challenges in your research projects?

DataWorks! Help Desk is an information hub where researchers in the biological and biomedical fields can find resources and best practices for managing research data and adopting data sharing and reuse practices.

Consult the Help Desk for tips on how most easily to manage data before, during, and after your research, as well as to comply with the NIH Data Management and Sharing Policy.

Explore key resources on topics such as

- Collecting and organizing data
- Making your data findable, accessible, interoperable, and reusable (FAIR)
- Complying with funder requirements in the NIH Data Policy
- Writing data management plans
- Planning for data sharing and reproducibility
- Finding and selecting repositories

DataWorks! Help Desk is a component of FASEB DataWorks! which is designed to bring the biological and biomedical research communities together to advance human health through data sharing and reuse.
