FASEB INITIATIVE

ASSESSING SCIENTIFIC NEED FOR ANIMAL MODELS

As public policy on animal research evolves, it's essential to represent the views of practicing scientists in peer-reviewed literature. FASEB is launching the Assessing Scientific Need for Animal Models (ASNAM) initiative to empower researchers to lead the conversation through high-quality commentary and perspective articles that articulate the current scientific need for animal research.

FASEB Will Support:

- Identifying and connecting researchers with other experts for collaborative pieces.
- Professional editorial and manuscript support to enhance clarity, impact, and submission-readiness.
- Guidance on selecting the right journal and navigating submission processes.

TARGET AREAS

- Aging and Longevity Research
- Cancer Biology
- Cardiovascular Research
- Environmental Medicine
- Immunology
- Infectious Disease
- Gastroenterology
- Metabolic Disorders and Endocrinology
- Nephrology
- Neuroscience
- Nutrition Science
- Pain Research
- Pathology
- Physiology
- Regenerative Medicine
- Reproductive and Developmental Biology
- Respiratory Research
- Rheumatology
- Sepsis Research
- Substance Use Disorder Research

Timeline:

Article development, editing, and submission will take place throughout the fall with the goal of submitting for publication near the end of this year.
