## The American Society for Investigative Pathology

1801 Rockville Pike, Suite 350

Rockville, MD 20852

<https://www.asip.org/>

*The ASIP is an international society of scientists that is based in America and serves as a professional home for investigators in academics, industry, biotechnology, and other careers that emphasize disease-related basic science and translational research.*

[asip.org](https://www.asip.org/)

# ASIP

American Society for Investigative Pathology

## Mission Statement

The mission of the Society is to promote the discovery, advancement, and dissemination of basic and translational knowledge in experimental/investigative pathology and related disciplines...The Society advocates for the practice of experimental/investigative pathology and fosters the professional career development and education of its members. The Society promotes equal representation and opportunity among investigators in experimental/investigative pathology research and related disciplines. These objectives are achieved by fostering investigation into the molecular and cellular pathogenesis, diagnosis and classification, pathophysiology, and prognosis of disease through meetings, scientific publications, educational activities, career development events, activities, and other research proceedings.

## FASEB Membership

The parent organization of the ASIP (the American Society for Experimental Pathology) was founded in 1913. The ASIP is considered one of the founding members of FASEB, having joined the Federation in 1913.

“  
*I am now more aware of the challenges in science beyond the bench that have a direct impact on research. It has been a valuable experience learning how to communicate science to the public and how to effectively advocate for policies that positively impact the biomedical workforce.*

**DENNIS JONES, PHD**  
FASEB Board Early-Career Representative, 2020-2022

**ASIP**  
American Society for Investigative Pathology

“  
*I am honored to represent early-stage trainees. I advocate for graduate student and postdoctoral policies and provide the viewpoint of these trainees, which I believe is valued among the established investigators on the SPC. My involvement on the committee has been invaluable toward my career development, and I am very grateful for the opportunity.*

**MORGAN PREZIOSI, PHD**  
FASEB Science Policy Committee Early-Career Representative, 2020-2022

# ASIP

American Society for Investigative Pathology

## Scientific Society Collaborations and Partnerships

The ASIP partners with other scientific societies to provide scientific meetings and virtual events on various scientific topics.

[asip.org](http://asip.org)

# ASIP

American Society for Investigative Pathology

## Society Collaborations and Partnerships

The ASIP co-manages ICPI with the Association of Pathology Chairs. ICPI has five founding member Societies, including USCAP, CAP, ASCP, APC, and the ASIP.

## Scientific Meetings

The Annual Meeting of the ASIP has taken place at *Experimental Biology* since its inception in 1993.

The final meeting of the *Experimental Biology* organization will take place in April 2022 in Philadelphia, PA (April 2-5, 2022). The ASIP is working to develop a new multi-society, multi-disciplinary scientific meeting for 2023 and beyond in conjunction with partnering societies.

## Scientific Meetings

The ASIP also holds a stand-a meeting entitled  
***Pathobiology for Investigators, Students, and Academicians.***

A promotional banner for the PISA 2020 meeting. The background is a dark blue field with a glowing, interconnected network of white and light blue lines, resembling a molecular or data structure. The text is arranged in several sections: 'PISA' in large, bold, dark blue letters on the left; 'PATHOBIOLOGY FOR INVESTIGATORS, STUDENTS, & ACADEMICIANS' in smaller, white, all-caps letters below it; 'Virtual & Interactive Meeting Experience' in a large, red, cursive script font on the right; the ASIP logo (ASIP American Society for Investigative Pathology) in white in the bottom left corner; and a white calendar icon in the bottom right corner showing the dates 'NOV. 9-13 2020' and the hashtag '#PISA2020' below it.

## Membership Communities – Scientific Interest Groups

Scientific interest groups are designed to represent the diverse research interests of the ASIP membership and to provide members with the culture and experience of a small specialty society within the larger whole of a research-oriented membership with eclectic interests.

## Mentoring Programs

it's time for a

### PathForward

LIFE-LONG MENTOR PROGRAM

**Your mentor will...**

- Advise and coach
- Provide constructive feedback
- Enhance your visibility
- Facilitate networking
- Assist with grants and publications

PathForward is a year-round distance mentoring program for junior faculty and senior postdoctoral fellows. This is a program to provide guidance related to how to get the most out of the meeting for first-time meeting attendees or individuals with less experience attending scientific meetings. Trainees that request to participate in the PathFinders program will be matched with a "meeting mentor." Our mentors represent highly engaged and accomplished senior ASIP members who provide their mentees with career development advice, professional skills growth, and direct assistance other important aspects of research careers. Mentorship can provide career development, professional skills growth, and even grant preparation assistance. We are recruiting both mentees and mentors for this program.

[ASIP.ORG](http://ASIP.ORG)

**PathForward** is a year-round and life-long mentoring program for junior faculty and advanced postdoctoral fellows. Mentors are drawn from the senior membership of the Society.

**PathFinders** is a mentoring opportunity for first-time attendees of the ASIP scientific meetings. This program was created to offer guidance and build camaraderie between ASIP trainees and regular members and offer guidance to trainees who attend the meetings.

## Membership Communities

Women in Pathology is a community within the membership of the ASIP that is focused on issues that face women in science, and is committed to recognizing women's scientific achievements and fostering their career development and advancement in pathobiology research. Women in Pathology addresses challenges for women in science at every stage of career and life – as trainees, as active biomedical researchers, during transitions into career breaks required for family life, during transitions back into professional life as a mother, and as advanced investigators. Women in Pathology provides innovative opportunities for engagement by women in science to participate in productive networking, development of meaningful professional partnerships, and mentoring.

# ASIP

American Society for Investigative Pathology

## Research and Science Policy Activities

The Research and Science Policy Committee functions to ensure that the public affairs concerns of ASIP members are addressed and communicated appropriately to governing bodies. This is accomplished in cooperation with FASEB and the wider biomedical and research communities. Issues of concern to the ASIP Membership are communicated through the Research and Science Policy News newsletter.

# ASIP

American Society for Investigative Pathology

## Career Development and Education

The ASIP provides career development activities and events throughout the year, as well as virtual events focused on diversity, equity, and inclusion, professional development, and science communication (social media for scientists). The ASIP also has a professional job board that is available to employers and job seekers – PathologyJobsToday.org.
